To,  
The Hospital Administration

**Subject:** Application for Freelance Data Science Collaboration

Dear [Institution/Team],

I am writing to express my interest in collaborating with your esteemed institution as a **Freelance Data Scientist and Analytics Consultant**, specializing in **AI-powered healthcare and business analytics**. With a **B.Sc. in Mathematics**, an ongoing **PG Diploma in Applied Statistics (PGDAST)** from **IGNOU**, and nearly **10 years of combined experience in Sales, Pharma, healthcare, radiology, and data analytics**, I aim to bring practical, data-driven insights to enhance your organization's decision-making and performance outcomes.

Through my **freelance practice — AI-Powered Data & Analytics Services (Alappuzha)** — I provide analytical support and solutions for hospitals, diagnostic centers, and small businesses. My services include:

- AI-assisted data analysis and predictive modeling
- Healthcare data management and digital record analytics
- Business performance tracking and Power BI dashboards
- Sales and inventory trend visualization for informed planning

In addition to my **Data Science internship at RP2 Pvt Ltd**, where I actively use **Python (Pandas, Scikit-learn)** and **SQL** for exploratory data analysis, feature engineering, and model building, I have also gained extensive experience as a **CT Technologist and Radiographer** at Govt Medical College Kottayam, HLL Lifecare and Sahrudaya Scans. This blend of clinical and analytical experience helps me translate raw data into actionable insights, especially within the healthcare domain.

I primarily work on **Ubuntu Linux**, embracing the open-source ecosystem that aligns with India's mission of self-reliant and transparent digital progress. My approach emphasizes clarity, reproducibility, and cost-effective solutions using open technologies.

I look forward to collaborating with your institution on projects related to healthcare analytics, research informatics, or data-driven process optimization. I am confident that my multidisciplinary background can help bridge the gap between clinical operations and modern data science practices.

Thank you for considering my proposal. I look forward to the possibility of working together to make healthcare and business decisions more data-driven and efficient.

Warm regards,

**ROBIN XAVIER**

Freelance Data Scientist | AI & Data Analytics Specialist
