To,

Dear HR or Recruitment Team,

I am writing to apply for an **entry-level** or **contractual position** as a **Data Analyst** or **Data Scientist** in healthcare at our hospital. With a B.Sc. in Mathematics, ongoing PG Diploma in Applied Statistics (PGDAST) from IGNOU, and hands-on experience in radiology and data science, I am eager to contribute to your institution's data-driven research, informatics, and healthcare analytics initiatives. My background is rooted in the medical field, where I am striving to blend healthcare expertise with modern technology and analytics.

In my current **Data Science internship** at RP2 Pvt Ltd, I work with **Python** (Pandas, Scikit-learn) and **SQL** for exploratory data analysis, data cleaning, and feature engineering, applying regression and classification models on healthcare-related datasets. I primarily work on **Ubuntu Linux**, appreciating its **open-source ecosystem** that aligns with India's vision for self-reliant and transparent digital growth. Previously, as a CT Technologist and **Radiographer** at institutions such as HLL Lifecare and Sahrudaya Scans, I gained strong exposure to tele-radiology, oncology, and medical imaging technology. Even though I have developed analytical and technical capabilities, I believe real growth happens when one learns and contributes within knowledgeable and inspiring institutions like yours.

India holds huge potential in the healthcare analytics and technology domain. Working within India itself seems promising in the near future, as our nation is progressing rapidly in global development and policy. For professionals like me, this presents an opportunity to build a meaningful career while learning from great organizations and dedicated people.

I am excited about the opportunity to be a part of your institution.

Thank you for considering my application. I look forward to your response.

Sincerely,

Robin Xavier
